## Purpose

This policy establishes the framework for identifying, managing, and classifying information assets throughout their lifecycle to ensure appropriate levels of protection and accountability, in accordance with ISO/IEC 27001:2022.

## Scope

Applies to all information assets within the scope of Stark Industries Inc.'s Information Security Management System (ISMS), including physical devices, software, cloud environments, data, and personnel with access to systems.

## Objectives

- Ensure all assets are inventoried, classified, and assigned ownership.
- Protect assets according to their value, sensitivity, and risk level.
- Prevent unauthorised access, disclosure, alteration, or destruction.

## Asset Types

Assets covered by this policy include:

- **Information Assets** (e.g. source code, data, documentation)
- **IT Assets** (e.g. servers, laptops, CI/CD tools, GitHub)
- **Cloud Services** (e.g. AWS infrastructure)
- **Applications** (e.g. admin tools, SaaS platform)
- **Personnel & Roles** (access rights and responsibilities)

## Asset Inventory (Ref: A.5.9)

- All assets must be recorded in an **Asset Inventory**, maintained by the **Cyber Security GRC Analyst**.
- Each entry must include:
  - Asset ID
  - Description
  - Type
  - Location
  - Owner
  - Classification

- Associated threats and vulnerabilities
- The inventory is reviewed at least annually and when significant changes occur.

## Asset Ownership (Ref: A.5.10)

- Each asset must be assigned an **owner** responsible for:
  - Ensuring the asset is properly protected
  - Classifying the asset
  - Managing changes and reporting risks

## Acceptable Use of Assets (Ref: A.5.15)

- Users must follow the **Acceptable Use Policy** when handling company assets.
- Misuse, negligence, or unauthorised use will result in disciplinary action.
- Employees must report lost or compromised assets immediately.

## Asset Classification (Ref: A.5.12 & A.8.2)

- Assets must be classified based on **confidentiality, integrity, and availability**.
- Stark Industries uses the following classification levels:
  - **Confidential:** Restricted to authorised personnel only
  - **Restricted:** Limited access, operational use
  - **Internal Use Only:** General employee access, non-public
  - **Public:** Approved for public release

## Information Labelling (Ref: A.8.3)

- Digital and physical information must be labelled according to its classification.
- Labelling must be maintained throughout the asset's lifecycle.

## Media Handling (Ref: A.8.10 – A.8.12)

- Storage devices containing sensitive information must be:
  - Encrypted
  - Tracked for movement
  - Wiped before disposal or reuse
- Disposal must follow secure erasure standards.

## Asset Lifecycle Management

- Assets must be tracked from acquisition to decommissioning.
- Decommissioned assets must be securely disposed of with appropriate records retained.

## Roles and Responsibilities

| Role                         | Responsibilities                                          |
|------------------------------|-----------------------------------------------------------|
| Asset Owners                 | Ensure asset registration, classification, and protection |
| GRC Analyst                  | Maintain inventory, support audits, track asset risks     |
| Information Security Manager | Oversee classification policy and coordinate reviews      |
| All Employees                | Follow policies for handling, reporting, and using assets |

## Policy Review

- This policy is reviewed **annually** or upon significant change to the environment or regulatory requirements.
